

In Music at Avanti Fields, lessons focus around developing skills in three aspects of Music – Performance, Composition and The Music Industry. Pupil's will be able to think for themselves and explore the links between character and conduct as well as developing empathy to help explore the importance of music within different societies and cultures. Lessons include a range of activities starting with how to read rhythmic and stave notation, moving onto group and solo performance skills and ending with composition and how to analyse different pieces of music from a wide range of genres. Students gain valuable knowledge of key Music concepts with explicit links to the Model Music

- - Learn how to practice and use given time wisely.
